EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Chia-hao La on April 9, 2007.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the caption of the figure 4 submitted 12/04/2003 should read "FIG. 4 Amended". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Surrender of original Patent

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Reasons for Allowance

Claims 35-73 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Murdock, taken alone or in combination of other references, does not teach or fairly suggest a method or a programmable input/output device comprising, among other things, a plurality of programmable elements that select the standard with which the output buffer and the input buffer respectively modify the output and input signals (claim 35); means for selecting the selected logic standard from a plurality of logic standards (claim 44); programmably selecting the selected one of a plurality of logic standards (claim 49); an input buffer having circuitry controlled by at least one of the plurality of programmable elements to select between a first logic standard and a second logic standard wherein the second logic standard is a differential logic standard (claim 52); an output buffer having circuitry controlled by at least one of the plurality of programmable elements to select between one logic standard and a differential logic standard (claim 62); and a plurality of programmable elements for selecting the logic standard at which the input and output buffers operate (claim 71), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
